Application # 09/758,573
Submitted February 16, 2005
Reply to Office Action of August 16, 2004

Kobayashi suggest the elements required by independent claims 1 and 12. Further, Cullen does not suggest that a "video signal is digitized and encoded" or that the video signal "is transmitted across [the] network". This fundamental element of the claimed invention is entirely lacking in Grimsrud, Kobayashi, or Cullen and their combination. For this reason alone, claim 21 should now be allowed.

F. Reconsideration Requested

53. The undersigned respectfully submits that, in view of the foregoing remarks, the rejections of the claims raised in the Office Action have been fully addressed and overcome, and the present application is believed to be in condition for allowance. It is respectfully requested that this application be reconsidered, that these claims be allowed, and that this case be passed to issue. If it is believed that a telephone conversation would expedite the prosecution of the present application, or clarify matters with regard to its allowance, the Examiner is invited to call the undersigned inventor at 408-739-9517.

Respectfully submitted,

Kendyl A. Roman
